Doug - As you know, Mike and I met with Assemblyman Saladino and the Water Districts last Friday relative to the full containment study. Hopefully the discussion of it (Agenda Item 1) at Thursday's meeting will be shorter because of it. However, they did raise one issue that they would like to discuss and we agreed it could be on the agenda. It related to how to speed up payments relative to the public water supply contingency program. I know that there is more to it than just delays in processing payments. I'm not sure it will resolve anything but I think that it will be useful to get it on the table. Let me know what you think. Jim H

Doug,
Since we are still tweaking the agenda may I suggest that Items 3-5 be combined. All of these items should have the head of "Hotspot Investigation".
The ONCT is being evaluated by Northrop Grumman, not the Navy so I took out the sub-bullet stating "Navy follow up work". The Navy is providing data to NG that may need to be evaluated to address the ONCT. I have attached the suggested revisions.
Thank you,
Lora

Importance: High

Thank you Doug.

Since the purpose and focus of these meetings is ground water I would like to suggest the following tweak:

NWIRP/Grumman Groundwater Quarterly Coordination Meeting.

We do have recent 1, 4 dioxane GW sampling data we could share.

It would be helpful if the water districts could share their 1, 4 D data as well.

Best Regards

Ed Hannon

How about going back to "NWIRP/Grumman Quarterly Coordination Meeting"?

I will change the agenda heading before sending out next week.

Also, yesterday I asked if you could discuss the 1,4, dioxane data. You agreed. Would you mind if I put that down as an agenda item after the DEC report out on the radium 226 and 228 sampling?

Thanks and have a good weekend.

Good Morning

I noticed the title of the next quarterly meeting scheduled for Thursday October 29th is the "NWIRP Quarterly Meeting". As you may recall under the Northrop Grumman OU2 Order on Consent NG committed to participating in OU2 TAC Meeting's for NG's role in OU2. Under that same Order NG prepared and submitted a plan for "Coordination with the US Navy on the development of a plan for RE 108 Hot Spot".

Previously these meetings were titled NWIRP-Grumman Quarterly meeting then NWIRP/Grumman Quarterly Coordination Meeting. The next meeting has been titled the "NWIRP Quarterly Meeting".

I would like to recommend to Lora and yourselves we change the title of these meetings to correctly reflect Northrop Grumman's participation and our satisfying our commitments under the OU2 Order.

Below is a title for your consideration:

- Quarterly NWIRP and Northrop Grumman OU2 Meeting

Your thoughts?

Thank You

Ed Hannon

Manager ESH&M
